## FEATURES

- ⊙ Cherry MX Blue Key Switches: with built-in gold-crosspoint contacts, gold-plated contact closures, and pressure-resistant metal alloy springs for the most precise and accurate feel. Rated at 50-million keystrokes for utmost durability.
- ⊙ Full Anti-Ghosting Support: across all zones (N-Key Rollover).
- ⊙ On-the-fly Record: for macro key settings (M1 ~ M6) with on board memory.
- ⊙ Disable windows key: (turn left WINDOWS key into CTRL key) to prevent accidental activation of the Windows Start function during gaming session.
- ⊙ 6 key & N key rollover switchable: making keyboard functions and macros compatible even on OS X systems. With combined N-key and 6-key rollover together, ensuring each key press is correctly detected regardless of how many keys are pressed.

# MACRO SETTING PROCEDURE

Step1 : Press the red MK Key (MK LED key will turn on to indicate 'On' status).

Step2: At the same time, press Fn+M1 (or M2 – M6 key).

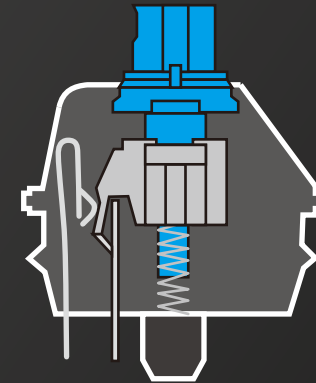

Step3 : Start your recording (up to 31 keys can be recorded) and simply press the Fn + M1 (or M2-M6) keys again to complete recording.

# CHERRY MX BLUE

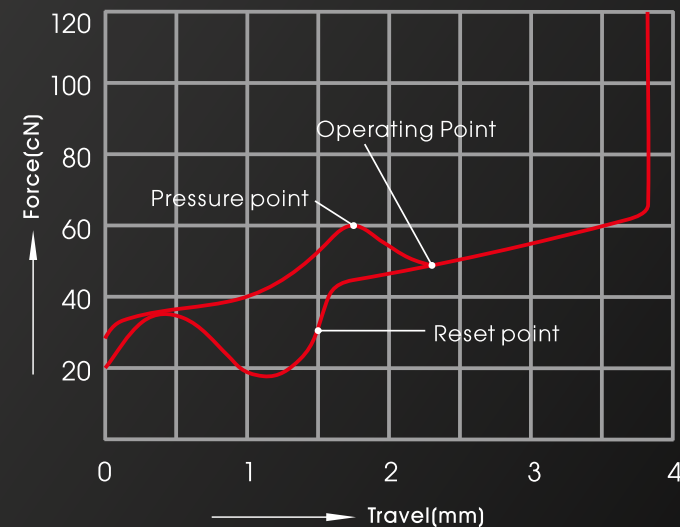

100% CHERRY MX BLUE KEY SWITCHES - TACTILE ACTUATION,  
CLEAR AUDIBLE CLICK.

ACTUATION DISTANCE: 2.2MM | OPERATING FORCE: 60G

Cherry MX Blue switches: add a deliberately louder 'click' sound to the existing tactile bump, allowing for greater typing feedback. This makes it easier to know that you've hit the activation point. This is achieved by a more complicated mechanism, with a blue plunger and a white slider. When the actuation point is reached, the slider is propelled to the bottom of the switch and the click noise is produced.
